## Sir Thomas J. Lipton's Decision and How It Benefits You

THE World War brought about an over-supply of tea. A year ago, packers of ordinary teas were forced to cut prices.

Whether to reduce the price of Lipton's Famous Yellow Label Tea and offer a quality to meet ordinary competition, or to maintain and improve, if possible, the quality, was the big problem put up to Sir Thomas J. Lipton, founder and head of the great Tea Plantations and Factories which bear his name.

At that time, Lipton's Gold Label Brand of Orange Pekoe Tea—a blend of special selections of the finest flavored teas, retailed at a dollar a pound and more, and sold principally in the so-called "fancy grocery" trade.

Sir Thomas Lipton's immediate decision was that if the higher-priced Gold Label

Orange Pekoe Tea was any better quality than the famous Yellow Label Brand, then the Gold Label quality and standard should be at once adopted for the Yellow Label Brand. Furthermore, if a price reduction in the improved Yellow Label Brand were possible, it should be made.

Last year the Gold Label Brand was discontinued. Today Lipton's Yellow Label Brand takes its place as Lipton's finest tea and is the most delicious and satisfying tea the world produces, and at a reduced price.

If your grocer does not sell Lipton's Yellow Label Tea, send us his name and we will mail you a free sample, together with the name of a grocer who can supply you. Address THOMAS J. LIPTON, Inc., Terminal Building, Hoboken, N. J.

Look for the signature of Sir Thomas J. Lipton on every package of tea you buy thus—

## RETESTS WILL BE CARRIED OUT

State of Vermont Has  
Enough Money to Do  
That Work

IS NECESSARY  
TO ERADICATION

Of Tuberculosis In Herds  
Already Given First  
Test

Tuberculin retests in herds of cattle already tested will be carried on by the Vermont state department of agriculture through the winter, Commissioner E. S. Brigham said yesterday. Enough of the appropriation was reserved to carry on the retest work, as this is a necessary feature of the eradication work. Retests are not expensive, as few reactors are found. Where they are found, the owners have a choice of keeping the animals for breeding purposes only or of killing them and securing a rebate from the state.

Animals which react to the tuberculin tests may be used for breeding with comparative safety, as only one case has ever been noted in the state in which a calf was infected before birth.

### INGROWN TOE NAIL

How to Toughen Skin so Nail  
Turns Out Itself

A few drops of "Outgro" upon the skin surrounding the ingrowing nail reduces inflammation and pain and so toughens the tender, sensitive skin underneath the toe nail, that it cannot penetrate the flesh, and the nail turns naturally outward almost over night. "Outgro" is a harmless, antiseptic manufactured for chiropodists. However, anyone can buy from the drug store a tiny bottle containing directions.—Adv.
